

What is claimed is:

1. A rear grip apparatus for a personal watercraft wherein a seat is placed on a deck and a rear grip, which can be grasped by a passenger, is disposed rearwardly of said seat, characterized in that

said rear grip includes a body member of a U-shaped section or an H-shaped section having a sculpted recessed portion opening upwardly, and a grip face member in the form of a cover for being fitted on said sculpted recess from above; and

said body member and said grip face member are both molded articles of a resin.

2. A rear grip apparatus for a personal watercraft according to claim 1, characterized in that said grip face member is a product of an injection molding process, and has non-slip textured irregularities formed at a portion thereof.
